**BELT TOOLS****L.X. IMPROVED BELT PUNCH OR SPLICING TOOL AND LACE CUTTER  
WITH LACE CUTTER ATTACHMENT**

Fig. 516A

The combined belt punch or splicing tool and lace cutter is a tool which has long been needed. It does the work of two. It cuts the lace leather, punches the hole in the belt and draws the lace through. This tool without the lace cutter attachment is a time and teeth saver. It will catch the lace and pull it through the belt, when the lace only projects  $\frac{1}{4}$  to  $\frac{1}{2}$  inch through the belt. It does the work quickly and simply.

Price, with Lace Cutter Attachment...each | 1.00 || Price, without Attachment....each | .50

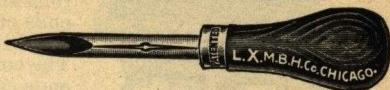

**WITHOUT ATTACHMENT**
